

Creating Your First Stored Procedure

What We're Going To Do...

1. Create a Stored Procedure
2. Execute the Stored Procedure
3. View Results

Don't Freak Out!

Don't freak out if this seems like too much.

The idea here is to show you the main steps.

We'll go over all the details later in the course.

Stored Procedure

Calculate Time to Travel A Distance

Steps:

- o Accept distance and velocity as parameters
- o Calculate time as distance / velocity
- o Output result.

Examples
